

Dear FCC,

K-Love has been a part of our every day lives. We have it tuned into our cars, home and computers at work. I have been in local stores and hear it playing, what a calming factor it has on those around me. We hear the community announcements on the station so we know where there are some ministries we may attend or free singing groups we may hear.

K-Love lets us know about helping children in need also. They also shared with us about how to help our communities during hurricane relief across the nation. We hear news from around the world too.

Do Not displace K-Love by an LPFM Broadcaster. We NEED K-LOVE in our lives as they are already a part of our every day.
